

ALL NEW OPEL MOKKA /

Price and Specification Guide | Ireland | July 2023

FIND OUT MORE

ALL-NEW OPEL MOKKA

Customer Notice:

Dear customer,

The enclosed Price and Equipment Guide reflects Irish pricing and specification in normal circumstances.

Please be advised however, Opel is impacted by temporary challenges in the global supply chain, including certain component shortages. Unfortunately, in the first instance, this means some customers may experience significant delays to delivery.

In the second instance, due to the present production challenges, some options for models across the Opel range are unavailable until further notice. Furthermore, Opel may temporarily offer vehicles with substituted equipment or features in place of standard equipment, or July suspend features temporarily.

These are measures taken to secure production of vehicles for customers.

As information becomes available from our manufacturer and working with our partners in the Opel Dealer Network in Ireland, Opel Ireland will endeavour to keep customers up to date regarding the order status and equipment featured on their new vehicles.

E & OE July 2023. *Fuel consumption figures are determined according to the WLTP test cycle. The fuel consumption you achieve under real life driving conditions and CO2 produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO2 with other vehicles tested using the same technical procedures. For more information contact your local Opel Dealer. All diesel models feature BlueInjection. Vehicles with BlueInjection technology will need regular AdBlue® top-ups also between servicing requirements. An indicator integrated into the on-board computer will warn you when you need to top up. More information see www.opel.ie/adblue. In accordance with regulations R (EC) No. 715/2007 and R (EC) No. 692/2008 (in the versions respectively applicable).

ALL-NEW MOKKA-e PERFORMANCE

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Sport: for a dynamic drive with a responsive throttle and the highest top speed and torque.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

Charging

The Mokka-e's charging flap's Padlock LED lights up when the cable is correctly plugged in and locked and then acts as a user interface to show the charging status via coloured LED lights:

- White: welcome light that helps to light up the area, especially useful in dark conditions
- Flashing green: charging in progress
- Solid green: charging complete
- Solid blue: delayed charging toggled; changes to flashing green when charging commences
- Solid red: malfunction

The driver July also choose from two settings:

- Immediate charging (the standard setting): Starts charging as soon as the vehicle is docked for charging;
- Delayed charging: This is especially useful for when cheaper electric rates are desired, e.g. charging at night. Simply enter a charging start time.

E&OE July 2023. *Images shown for illustration purposes only.

PERFORMANCE	MOKKA-e
Maximum power kW / bhp	100 / 136
Maximum torque Nm / lb. ft.	260 / 192
